

Hall A RC Update

Hall Status

- **Controlled Access on Day; taking beam on Swing and Owl**

Various Accesses Today

- Beam: checking LHRS and SBS beam signals
- GEMs: Gas (switch to pre-mix)
- Moller: Checking sensor communications

SBS Magnet

- Yesterday: Jessie & team determined plan for implementing shims
- Today: Implementing shims to mitigate the problem

Program on Swing and Owl

- Beam tuning through differential pumping station and to dump (BB magnet OFF and ON)
- Beam centering program + raster and BPM calibrations (BB magnet ON)
- Detector commissioning program (BB magnet ON)
- Optics program (BB magnet ON)
